

KEVIN STEVEN REYES MOROCHO

Industrial and Civil Engineer | Data Engineering: SQL · Python · PySpark · Data Modeling

Trujillo / Chimbote, Peru · kevinarm19@gmail.com · +51 926 255 078 · [linkedin.com/in/kevin-steven-reyes-morocho](https://www.linkedin.com/in/kevin-steven-reyes-morocho) · github.com/Kevinarm31 · medium.com/@kevinarm19 · kevinarm31.github.io

PROFESSIONAL SUMMARY

Industrial and Civil Engineer with more than 5 years leading management systems (ISO 9001, 14001, 45001), key performance indicators (KPIs), and maintenance and operations processes in the mining and industrial sectors. To this foundation, I add data engineering tools —SQL, Python, PySpark, Kafka, and dimensional modeling— applied in my own database, Data Warehouse, ETL and streaming pipeline, and API projects, with the goal of formalizing and scaling the analysis of operational indicators. I am looking to bring this combination of processes, management systems, and data to a Data Engineering team.

DATA ENGINEERING PROJECTS

Real-Time Processing — Docker, Kafka, and Spark Structured Streaming — github.com/Kevinarm31/kafka-spark-streaming-docker

Streaming pipeline with Apache Kafka and Spark Structured Streaming that processes events in micro-batches, with output to the console and to a table queryable with SQL. Full environment (Zookeeper, Kafka, Spark cluster, and JupyterLab) orchestrated with Docker Compose, with a technical report and a published article.

Data Warehouse — Clinical Laboratory Inventory (MySQL) — github.com/Kevinarm31/datawarehouse_almacen-laboratorio-clinico

Star schema design and OLTP → OLAP migration (dimension tables, fact table, time dimension with a recursive CTE) for a clinical laboratory inventory database. Includes referential integrity validation and a published technical article documenting the full process.

Database Modeling — Clinical Laboratory Inventory (MySQL) — github.com/Kevinarm31/almacen-laboratorio-clinico-mysql

Three-level data modeling (conceptual, logical, and physical) for the OLTP inventory control system of a clinical laboratory, with documented entity-relationship diagrams.

ETL in Python — OLTP to Data Warehouse Migration (Docker) — github.com/Kevinarm31/etl-python_migracion-oltp-dw

ETL pipeline in Python (pandas, SQLAlchemy) that extracts data from a MySQL database and flat files, transforms and validates it, and loads it into a dimensional Data Warehouse idempotently. Reproducible environment containerized with Docker.

Python — World Cup Data Fundamentals and Analysis — github.com/Kevinarm31/python-fundamentos-analisis-mundiales

Exploratory analysis of historical FIFA World Cup data with Python (NumPy, Pandas), applying data cleaning, transformation, and visualization.

PySpark — Transformations, Aggregations, and SQL Queries on DataFrames — github.com/Kevinarm31/pyspark-dataframes-transformaciones

Transformations, aggregations, and SQL queries on DataFrames with PySpark (Apache Spark / Databricks), for large-scale distributed data processing.

PySpark ML — Exploratory Analysis and Linear Regression — github.com/Kevinarm31/pyspark-ml-fundamentals

Exploratory data analysis (EDA) and a linear regression model with Spark ML (pyspark.ml) to predict housing prices.

Tools API — REST API with FastAPI — github.com/Kevinarm31/tools-api

REST API built with FastAPI and Pydantic exposing CRUD operations on a tools catalog, with category filters, HTTP status codes, and OpenAPI/Swagger documentation. Deployed to the cloud (Render) with automatic deployment from GitHub.

WORK EXPERIENCE

Operations Supervisor — PILSAC – Seseveca del Perú S.A.C. · 10/2025 – 07/2026

- Daily consolidation in Excel of intake and production data for an anthracite coal plant (300–400 t/day, 10–15 intake trucks); material received, processed, graded, and rejected.
- Planned vs. actual production tracking, downtime logging and analysis (duration and cause), and equipment availability and performance calculation.
- Weekly and monthly management reports with tables and charts; cost and consumption control against budget and requisition entry in SAP / ERP.
- Led a team of 15 workers; preventive and predictive maintenance, annual OHS plan progress tracking, and internal audits.

HSE Supervisor — MINCOAL S.A.C. · 06/2025 – 10/2025

- Monthly calculation of frequency, severity, and accident-rate indices from man-hours, accidents, and lost days, at an iron ore beneficiation plant with 25 workers on 2 shifts.

- OHS records and statistics (incidents, accidents, medical absenteeism, environmental plan compliance) in Excel dashboards, with monthly reports to the mine owner.
- Tracked inspection findings through closure and monitored training man-hours and training program compliance.

HSE Supervisor — Consultores de Ingeniería Proyectos · 04/2025 – 05/2025

- Tracked man-hours, high-risk work permits, and HSE indicators for an infrastructure assembly project (13 workers), with periodic reports to the client.
- Structured the technical closeout dossier with full evidence traceability, approved without observations; zero lost-time accidents.

Occupational Health and Safety Supervisor — Compañía Minera y Maderera RA&OR S.R.L · 01/2024 – 03/2025

- Monthly incident and accident statistics to identify trends and prioritize actions: IDIA events dropped from ~12 to 3–4 per month (a reduction of over 60%).
- Per-unit maintenance records for a 30-vehicle fleet (17 pickups, 8 dump trucks, 5 vans): mileage-based scheduling, checklist inspections, and maintenance costs.
- Safety index calculation and monthly management reports for an operation with 53 drivers.

Maintenance and Infrastructure Coordinator — Escacorp S.A.C. · 01/2023 – 12/2023

- Maintenance budget control (PEN 100,000 per year for preventive and PEN 15,000 per quarter for corrective): actual vs. budget and cost breakdown, achieving an average 30% saving on the quarterly corrective maintenance budget.
- Logged maintenance work (date, asset, type, cost) across 7 sites and tracked maintenance schedule compliance.
- Evaluated 18 suppliers (lead times, costs, quality) and prepared progress valuations for payments.

HSE Supervisor — Escacorp S.A.C. · 04/2021 – 12/2022

- Calculated and reported OHS and environmental (ISO 14001) indicators for 80 workers across 7 sites, with training records by area.
- Management system document control and follow-up of non-conformities in ISO 9001, ISO 14001, and ISO 45001 audits.

High-Risk Work Safety Supervisor — Servitec GH – Ingeniería y Construcción · 01/2020 – 04/2021

- Recorded high-risk work permits, inspections, and PPE issuance per worker; periodic site safety reports.

Administrative and Logistics Assistant — Estación de Servicios San José S.A.C. · 07/2019 – 12/2019

- Reconciled ERP sales with cash and collections, controlled accounts receivable and fuel inventory (tank readings vs. system), and built sales reports by product and customer with pivot tables.

Warehouse Assistant — Representaciones e Inversiones J&M E.I.R.L. · 03/2017 – 03/2018

- Product stock ledger (kardex) in Excel, physical vs. recorded inventory reconciliation, and turnover and minimum-stock analysis for replenishment.

DATA ENGINEERING TRAINING

- SQL Para Todos — Google Cloud / BigQuery (Datapath) — certification
- Python (basic – intermediate) — certification
- Python para Todos — fundamentals, NumPy, and Pandas (DataHack) — certification
- Git Fundamentals in the Cloud — certification
- Apache Spark Fundamentals — certification
- Fundamentals of Consuming and Building APIs with Python — certification

EDUCATION

Industrial Engineer, Professional Degree — Universidad Nacional de Trujillo · CIP 324926

Bachelor's Degree in Civil Engineering — Universidad Privada del Norte

TECHNICAL SKILLS

Data Engineering: SQL · Python · PySpark · Apache Kafka · Spark Structured Streaming · FastAPI / REST APIs · Git / GitHub · Dimensional Modeling · ETL · Docker / Docker Compose · Databricks

Management Tools: Advanced Excel (pivot tables), Power BI, ERP / SAP (user level), PowerPoint, MS Project, AutoCAD

Management and Processes: Key Performance Indicators (KPIs), ISO 9001 / 14001 / 45001 Management Systems, Internal Audits, Maintenance Management

LANGUAGES

English — Basic Level
